# Kwesi Hammah.

SENIOR FULL-STACK DEVELOPER · FOUNDER, OUZATECH

Available for full-time, contract, and consulting engagements worldwide.

## PROFESSIONAL PROFILE

Senior Full-Stack Developer and Founder of Ouzatech, a software studio based in Accra, Ghana, serving ambitious clients across Africa, the UK, and the United States. I specialise in building high-performance web applications for healthcare, e-commerce, and enterprise SaaS: from a digital platform handling 2 million+ patient interactions annually to mobile-first e-commerce stores converting 40% better than off-the-shelf templates. Every engagement combines clean architecture, pixel-perfect UI, and robust, maintainable code, delivered on time and built to last.

## PROFESSIONAL EXPERIENCE

### Founder & Lead Developer · Ouzatech

2020 – Present

Accra, Ghana

- Founded and scaled a software studio delivering bespoke web platforms for clients across three continents; maintained 100% client retention.
- Architected the full digital platform for Korle Bu Teaching Hospital (Ghana's premier 2,000-bed facility), supporting 2M+ patient interactions per year at 99.9% uptime.
- Led end-to-end development of 20+ web applications spanning healthcare, e-commerce, construction, and enterprise SaaS verticals.
- Managed client relationships, scoped requirements, and oversaw delivery from discovery through to post-launch support.

### Senior Full-Stack Developer · Freelance & Contract

2018 – 2020

Remote

- Delivered high-performance web applications for startups and SMEs across Africa, the UK, and the US.
- Engineered mobile-first, conversion-focused platforms consistently achieving 90+ Lighthouse performance scores.
- Established modern development workflows utilising React, Next.js, TypeScript, and CI/CD pipelines, reducing deployment cycles by 60%.

### Full-Stack Developer · Early Career

2016 – 2018

Accra, Ghana

- Built responsive web applications using JavaScript, React, Node.js, and PostgreSQL for local SMEs.
- Translated Figma prototypes into pixel-perfect, accessible interfaces in close collaboration with design teams.
- Developed RESTful APIs and integrated third-party services including payment gateways and analytics platforms.

## SELECTED PROJECTS

### Korle Bu Teaching Hospital

Next.js TypeScript Healthcare

Complete digital transformation for Ghana's premier teaching hospital. Online appointment booking, 19 specialist department directories, NHIS integration, and real-time patient information system. Handles 2M+ interactions/year at 99.9% uptime.

### Papa's TeaHouse

Next.js Stripe E-Commerce

Premium tea e-commerce store with subscription management and loyalty programme. Sub-2-second load times; 40% higher conversion rate vs. previous template site. Mobile-first design with seamless Stripe checkout.

### Correnti Ghana

React Node.js CMS

Filterable project showcase and automated quotation system for a leading construction firm. Achieved 3x more project enquiries within the first quarter post-launch.

### Tesa Elevate

React PostgreSQL API

High-performance digital catalogue for 500+ products across multiple categories. Quadrupled online visibility with fast load times, intuitive navigation, and a polished brand experience.

## CLIENT TESTIMONIALS

---

*"The platform now handles over 2 million patient interactions a year with 99.9% uptime. His understanding of healthcare workflows made all the difference."*

**Mr. Mustapha Salifu**, Head of Public Relations, Korle Bu Teaching Hospital

*"We went from zero online presence to 3× more project enquiries within the first quarter. Outstanding work."*

**Mick Malovic**, Project Director, Correnti Ghana

*"Kwesi delivered a mobile-first design that converts 40% better than our old site. Revenue has never been higher."*

**Priscilla Adjei**, Manager, Papa's TeaHouse
